

**APPENDIX D-4**  
**Record Content Analysis Instrument**  
**(Database Fields)**

## APPENDIX D-4

### Record Content Analysis Instrument (Database Fields)

The following table represents the Microsoft Access© database structure devised and used to collect data for the record content analysis. The first column presents the data category, or criteria assessed; the second column shows the range of allowable data entries; and the third column contains information concerning operationalization of the criteria to assist in investigators' recall of rationale.

Criteria*	Values**	Data Coding Notes
Server	<ul style="list-style-type: none"> <li>– http</li> <li>– index-based</li> </ul>	
Host	<ul style="list-style-type: none"> <li>– FedWorld</li> <li>– GPO</li> <li>– nonbrokered</li> </ul>	
ASCII text available	y/n	
HTML available	y/n	
PDF available	y/n	
SGML available	y/n	
File format errors present	y/n	word wrap, uncontrolled indents, missing text
Spelling errors/typos present	y/n	
All dates in yyyyymmdd format	y/n	examine all dates in record
Acronyms	<ul style="list-style-type: none"> <li>– defined</li> <li>– not defined</li> <li>– nu</li> </ul>	
Legislative cite utilized	y/n	
Capitalization style	<ul style="list-style-type: none"> <li>– all caps</li> <li>– elements only cap</li> <li>– mixed</li> <li>– other</li> <li>– sentence case</li> </ul>	
Indentation present	y/n	regardless of adherence to <i>Guidelines</i> -specified style
Total number of elements utilized	integer	element is presented and populated (including where “none”, “n/a”, or similar acknowledgment of an absence of substantive content is present)
Blank elements present		element/subelement label present and no value present
Locally defined elements	actual value	any element/subelement not mentioned in <i>Guidelines</i> ; count null value if element label present
Hotlinks	element label	of value containing hypertext
Elements in preferred display order	y/n	per <i>FIPS 192</i>

(continued)

Criteria*	Values**	Data Coding Notes
Object represented	<ul style="list-style-type: none"> <li>– administrative catalog</li> <li>– agency homepage</li> <li>– bibliographic database</li> <li>– form</li> <li>– job line</li> <li>– miscellaneous documents in ad hoc collection</li> <li>– organization</li> <li>– program</li> <li>– publication</li> <li>– publications catalog</li> <li>– subject matter database</li> <li>– system of systems</li> <li>– unknown</li> </ul>	see semantics in Appendix C-4 Record Content Analysis Methodology
Aggregation	<ul style="list-style-type: none"> <li>– aggregated object represented</li> <li>– discrete object represented</li> <li>– object aggregates metadata</li> <li>– record aggregates objects</li> <li>– unknown</li> </ul>	see semantics in Appendix C-4 Record Content Analysis Methodology; “object aggregates metadata” overrides “discrete object represented”—e.g., discrete publications catalog
Container	<ul style="list-style-type: none"> <li>– broadcast (radio or TV)</li> <li>– CD-ROM</li> <li>– dialup</li> <li>– email</li> <li>– fax</li> <li>– ftp</li> <li>– gopher</li> <li>– listserv</li> <li>– microform</li> <li>– multiple</li> <li>– print</li> <li>– unknown</li> <li>– video</li> <li>– voice/telephone</li> <li>– web</li> </ul>	

(continued)

Criteria*	Values**	Data Coding Notes
Title descriptive	y/n/nu	per <i>Guidelines</i> : "...conveys the most significant aspects of the referenced resource...provide[s] sufficient information to allow users to make an initial decision on likely relevance...convey[s] the most significant information available, including the general topic area, as well as a specific reference to the subject."
Originator utilized	y/n	
Originator subelements utilized	y/n	"yes" even if no subelement label present
Originator subelements labeled	y/n	
Index terms-controlled utilized	y/n	
Thesauri	actual value	
Local subject terms	<ul style="list-style-type: none"> <li>– actual value if "US Federal GILS" or "U.S. Federal GILS"</li> <li>– nu</li> </ul>	
Abstract descriptive	y/n/nu	
Purpose utilized	y/n	
Agency program utilized	y/n	
Availability-distributor utilized	y/n	
Availability-resource description utilized	y/n	
Availability-order process utilized	y/n	
Source of data utilized	y/n	
Methodology utilized	y/n	
Access constraint	<ul style="list-style-type: none"> <li>– "none"</li> <li>– named</li> <li>– nu</li> </ul>	use "named" when value is substantive
Use constraint	<ul style="list-style-type: none"> <li>– "none"</li> <li>– named</li> <li>– nu</li> </ul>	use "named" when value is substantive
Point of contact	<ul style="list-style-type: none"> <li>– job title</li> <li>– nu</li> <li>– office</li> <li>– other</li> <li>– personal name</li> </ul>	
Schedule number	actual value	
Control ID utilized	y/n	
Record source subelements utilized	y/n	"yes" even if no subelement label present
Record source subelements labeled	y/n	
Date of last modification	actual value	

\* Criteria are arranged in convenience order for data collection using visual examination of printed record.

\*\* y = yes; n = no; nu = element not utilized.
